

## Aputure – Automatic Extension Tubes (3) to fit CANON EOS

Code: C-1754

The most versatile tool for macro work is a set of 3 extension tubes.

Place them between the camera body and prime Lens, have a diaphragm setting as low as possible if you are working without flash and combine it with a long exposure time. For flash shots the diaphragm setting has to be correspondingly greater compared with values calculated from the Guide number and distance. Computer flash
