Seagull – Right Angle Finder for Digital SLR Cameras

Code: E-3025

The Seagull digital/film SLR Right Angle Finder is a precision made device which will assist you in situations where eye level viewing may be inconvenient, such as close-

up / macro shots, copying, low and high angle perspectives, microscopy and telescoping.

To make image composition easier, the Seagull's advanced glass roof prism design ensures the image is always 'correct' and laterally reversed.

Rotatable through a full 360 degrees

SPECIFICATIONS

Optical construction:	9-elements in 8 groups, high quality glass roof prism.
Magnification:	1x & 3.25x switchable for critical focussing
Adjustable eyesight:	± 4 diopter (especially useful for spectacle wearers)
Eye-piece fittings:	CANON EOS 18/22mm, NIKON 22mm (circular screw type available as an optional extra), LEICA, PENTAX couplings will fit most cameras
